FISH PAN (SUS304 STEEL)

04

Austenitic Series(300 Series)

This stainless steel is the most widely used of all its kinds. It contains chrome and nickel and features good formability, weldability and anti-corrosion. The most common austenitic stainless steel is Type 304. There are also other notable austenitic stainless steels-Types 316L, 321 and 304J1 to name a few-produced by adding different alloy elements such as Mo, Ti and Cu. Main applications of austenitic stainless steel include.

- POLLOCK ROE STEELPAN
- SQUID STEELPAN
- COD STEELPAN
- SHRIMP STEELPAN
- ALUMINUM PAN

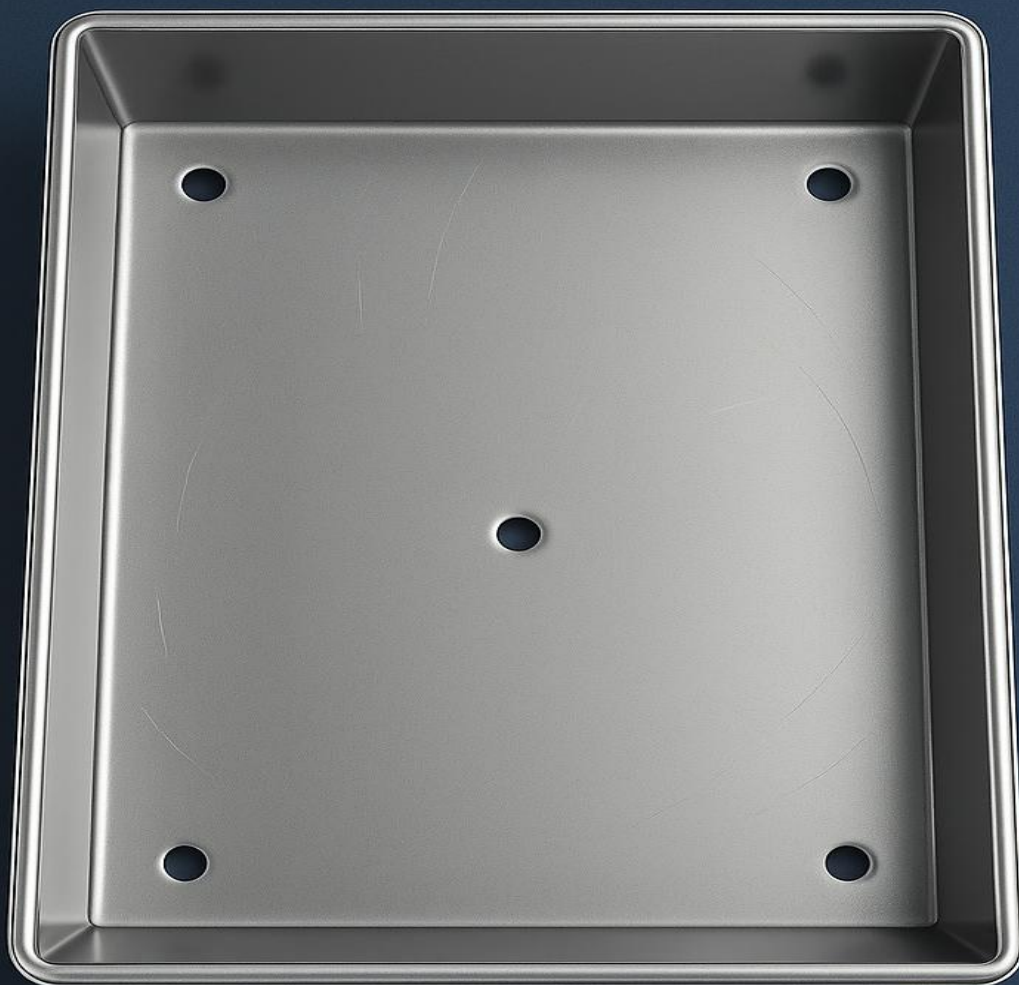

POLLOCK ROE STEELPAN

Premium Stainless Double Chamber
For Hygienic and Efficient Seafood Processing
Designed for Cod Roe / Alaska Pollock Roe Applications

POLLOCK STEELPAN

Premium Stainless Construction
Hygienic and Corrosion-Resistant
Ideal for Seafood Processing and Refrigeration

SQUID STEELPAN

Premium Stainless Construction
Food-Safe, Corrosion-Resistant
Ideal for Squid and Cephalopod Processing

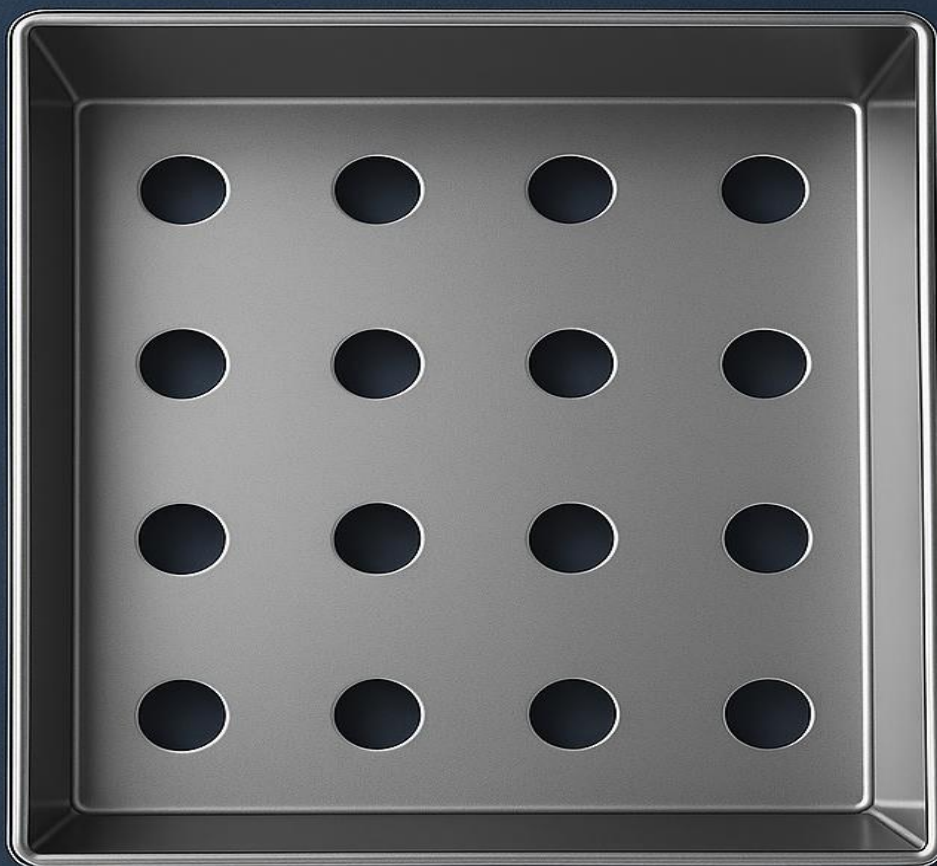

COD STEELPAN

Premium Stainless Construction
Hygienic and Corrosion-Resistant
Optimized for Cod and Deep Sea Fishing

SHRIMP STEELPAN

Premium Stainless Construction
Corrosion-Resistant and Hygienic
Perforation Pattern Adjustable

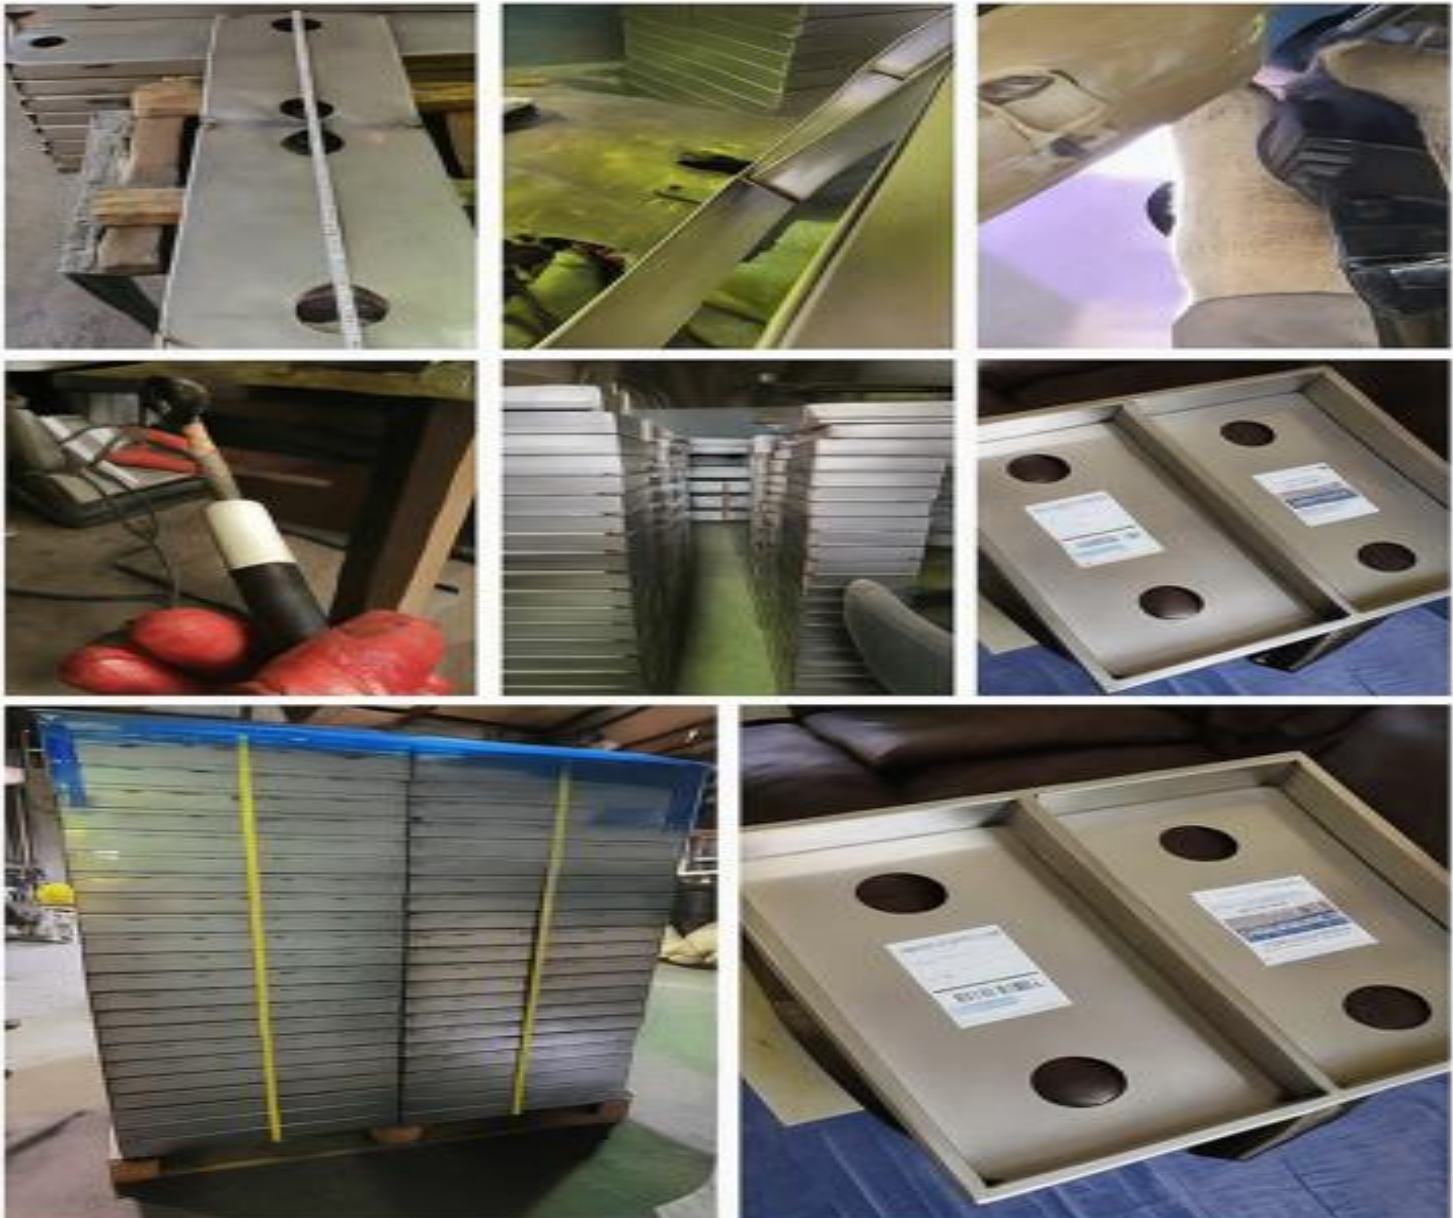

ALUMINUM PAN

Lightweight Construction
Corrosion-Resistant Surface
Versatile and Economical

Production Process

- Review of technical drawings
- Sample confirmation (with modifications if needed)
- Start of manufacturing
- Production schedule and product report submission
- Delivery of dimensional report for produced items
- Photo and video documentation provided
- Final inspection of product dimensions, welding quality, grinding, and polishing finish
(Defective or incorrectly sized products are excluded)
- Shipment

SHIP SPARES PARTS

ICM CORPORATION offers shipowners, charterers and management companies a door-to-deck or door-to-port delivery service for ship spares and marine parts.

We understand the importance of timely delivery and have in-depth knowledge of how these shipments need to be documented, handled and dispatched to vessels to comply with the local customs regulations.

We can advise transit times and the best mode of transport of goods, collection from the airport (or port), efficient customs clearance and delivery to the vessel alongside or offshore as required.

Our experienced team will give you a clear breakdown of expected costs and up to date information on when the delivery will be made.

We can also offer warehousing and storage if needed for future shipments, or a temporary space to keep items in a secure location.
